***Allowable Subject Matter***

1. Claims 32-58 and 60-62 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claims 32-36 and 39-44, the prior art of record does not disclose applying at least one further filament layer to each of the further rubber layers at defined desired filament angles referred to the advancement axis in each case with a second bobbin reel unit by rotating the second bobbin creel about the forwardly driven mandrels; controlling the rotational speed of the additional bobbin creel unit during the rotation about the mandrels in dependence upon the rotational speed of the first bobbin creel unit, the bobbin creel units being coupled to each other via a dead time and coupling factors.

With respect to claims 37-38, the prior art of record does not disclose applying at least one further filament layer to each of the first further rubber layers at defined desired filament angles referred to the advancement axis in each case with a second bobbin creel unit by rotating the second bobbin creel about the forwardly driven mandrels; applying at least one additional rubber layer to each filament layer utilizing a corresponding extrusion unit; controlling the rotational speed of the additional bobbin creel unit during the rotation about the mandrels in dependence upon the rotational speed of the first bobbin creel unit; and, controlling the rotational speeds of the additional bobbin creel unit in dependence upon a desired thickness of the additional rubber layer and the desired filament angles with the bobbin creel units being coupled to each other via a dead time and coupling factors.

With respect to claims 45-50, the prior art of record does not disclose contactlessly measuring the outer edges of the reinforced tube-shaped structure and the outer edges of the mandrel and determining the thickness of the reinforced tube-shaped structure from the positions of the outer edges.

With respect to claims 51-58 and 60-62, the prior art of record does not disclose a layer thickness measuring means with measuring units for measuring the outer edges of the reinforced tube-shaped structure at several positions on the periphery of the tube-shaped structure and at least one contactless measuring sensor for detecting the outer edges of the mandrel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
